

TREATING PAIN SAFELY:

Fewer Opioids and Better Results

Controlled Substances Education for Prescribers

JOIN US MONDAY, FEBRUARY 18, 2019

Swain County Hospital (Bryson City, NC)

SNOW DATE: 2/26/19

DESCRIPTION

Literature has shown that prescribers receive little education on the treatment of pain, resulting in less effective pain treatment with worse outcomes. Attendees will learn the evidence-based analysis of the relative effectiveness of medications and their side effects, recommendations on how to improve treatment of acute and chronic pain, and how to recognize substance use/opioid use disorders. This program will include the three required topics outlined by the new CME requirement in 21 NCAC 32R .0101:

- Controlled substances prescribing practices
- Recognizing signs of the abuse or misuse of controlled substances
- Controlled substance prescribing for chronic pain management

This program includes up to 3.0 hours of controlled substances content. Per NCAC rules: As of July 1, 2017, all physicians (other than residents), physician assistants, nurse practitioners, podiatrists, and dentists who prescribe controlled substances must satisfy the controlled-substance prescribing CE requirements as set forth by their licensing boards. Requirements vary by discipline and board.

AUDIENCE

Audience includes physicians, physician assistants, pharmacists, dentists, nurse practitioners, and podiatrists.

OBJECTIVES

Upon completion of this knowledge-based continuing education activity, participants will be able to:

- Describe the impact of the opioid crisis
- Identify the CDC guidelines for prescribing opioids for acute pain
- Identify the CDC guidelines for prescribing opioids for chronic pain
- Discuss what to do with patients on opioids that fall outside the guidelines
