DESCRIPTION

The coronavirus pandemic has brought to light the deep inequities in our current model of healthcare. The disproportionately high levels of COVID-19 cases, including hospitalizations and deaths among non-White racial groups reflect poorer conditions among these minority groups. There is also an inequitable distribution of health resources. Patient Navigation continues to be a viable option that can help address the fundamental weaknesses of our system and ensure we achieve optimal outcomes.

The UNC Friday Center will be hosting this virtual program.

AUDIENCE

Nurse practitioners, nurses, oncology nurse navigators, administrators, care coordinators, fellows, medical students, nursing students, patient navigators, community health workers, case managers, social workers, psychologists, patient advocates, community ambassadors, lay health advisors, community educators, peer support specialists, and lay volunteer patient navigators.
