## DESCRIPTION

This online, eight-week, self-paced certification examination review covers content areas in the School Nurse Certification Exam. Utilizing textbooks, manuals and other resources, the author of this program provides participants with the skills and strategies needed to pass the exam. This review features pre- and post-test study questions, as well as a final practice exam that simulates the actual School Nurse Certification Exam experience. The review is divided up into lessons that cover an area of focus on the exam and provide a review of key concepts, test-taking tips and strategies, and valuable final exam test preparation. The platform is easy to access through a high-speed internet connection and can be taken one week at a time or condensed into multiple lessons per week to allow for additional review time. By reviewing questions that were missed, these examinations allow participants to identify individual strengths/weaknesses and to focus their personal study areas on topics where they received a low score.

Participants are given access to all eight modules on day one so that they can study at their own pace, on their own time and from their home or work computer. **The participant will have eight weeks to complete ALL eight modules and the corresponding pre-tests, post-tests and final exam.** No extensions will be granted to the end of the eight week program as MAHEC is offering multiple start dates to accommodate participants' schedules.

## CRITERIA

Participants must be registered nurses, with bachelor's degrees in nursing or a NBCSN approved health-related field. Approval is based on a bachelor's degree or higher in a health-related field relevant to school nursing, including or in addition to a total of six (6) credits for undergraduate or graduate courses in any combination of the following subjects: Management of primary health care problems of children and/or adolescents, Health assessment of children and/or adolescents, Public health/community health/epidemiology.

**As of January 1, 2020, a bachelor's degree or higher in nursing or the equivalent in other countries will be required.** The participant should have at least 1 year of professional school nursing practice prior to taking this course. It is recommended that the participant have recently taken School Nurse: Roles and Responsibilities (an orientation workshop), provided annually by the NC Dept. of Health and Human Services, Division of Public Health, School Health Unit.

## EXAM WINDOWS
