<b>Early registration fees through October 26, 2018.</b>	
<b>SCHOOL NURSE</b>	<b>\$99.00</b>

## DESCRIPTION

Children are now attending school with more complex and chronic health needs. In order to assure safe and high-quality healthcare in the educational setting, school nurses need expanded skills and knowledge in order to meet the growing needs of their students.

Our vision for a successful and effective school nurse is one that meets the identified health needs of their children and supports the health and wellness of the school community. When children are healthy and their needs are met, they are ready to learn and can be academically successful. To reach that goal, nurses who provide the health services must be able to continually grow, learning new skill sets or refreshing skills and knowledge through professional development activities.

The goal of this program is to empower school nurses by providing them with up-to-date educational skill sets that leverage safer and more efficient delivery of care for their students.

## AUDIENCE

School nurses

## OBJECTIVES

*Attending this workshop does not establish, or verify a participant's competency in the topics discussed.*

Upon completion of this activity, participants will be able to:

- Describe the management of hypoglycemia and hyperglycemia at school
- Discuss regional cultural considerations that can impact school age children
- Review the school nurse's role in medication administration
- Identify the school nurse's role in delegating tasks
- Demonstrate tracheostomy care and suctioning, in and out catheterization, PICC line care, ostomy care, and G-tube feedings using task trainers
- Learn advanced physical examination skills/techniques
- Identifies the school nurses role in oxygen administration
- Recognizes seizure activity in the school age child (generalized or drop seizure) and their responsibilities to that child
