

CHILD CARE HEALTH CONSULTANTS

We look forward to continuing our work with you in 2018. Your Child Care Health Consultants promote healthy and safe environments for children in child care settings through consultation, training, and technical assistance services. We provide on-site consultation visits to assess your child care program focusing on health, sanitation, safety and nutrition. We provide free education services to child care providers and parents to address the issues of children with special health, developmental, contagious disease and/or chronic medical needs. Please enjoy a few photos of interactions with our child care community over the past year.

We appreciate making positive changes together!

2017 YEAR IN REVIEW

Healthcare action plans and staff training

Coaching and training on hand washing

First Aid & CPR courses at MAHEC

Nap time cot arrangements and sanitization for ITERS & ECERS

We see GERMS, GERMS, GERMS everywhere!

New outdoor learning environments

Coaching on health and illness in child care

Coaching for meal time transitions and family style dining for ERS

Tons and tons of hand washing!

Infant massage with parents and childcare providers

Safety hazard check

On-site trainings for child care staff

MAHEC CCHCs collaborate to serve you

Safe sleep trainings and written health policies

First Annual Boot Camp provided health and safety trainings and inspired early childhood educators!
