

# WOUND CARE ESSENTIALS 2019:

**Part 1: Taking the Ouch Out of the BooBoo (Neonate & Pediatric Wound Care)**

**Part 2: Strategies & Interventions for Adult Wound Management**

**MONDAY, DECEMBER 2**

## DESCRIPTION

Wound Care continues to bring challenges to the clinical setting every day for all patient populations. In addition, wound care of high risk and high acuity patients presents its own sets of skin care issues and complications; as well as factors that can affect overall wound healing. Providing the best possible care for patients with wounds can be challenging, confusing and costly. Attending this conference will provide you a better understanding when caring for all patients within the clinical setting; which will include neonates, pediatrics and adults. Spend the day learning about prevention, assessment, documentation and management of wounds and leave the conference with new ideas and strategies for pro-active care.
