DESCRIPTION

No field in medicine has a faster pace of change, innovation, and randomized trial data than cardiovascular disease. An annual update of the broad range of cardiovascular issues for physicians, advanced practice providers, and nurses is always of great intrinsic value. It is increasingly difficult for cardiologists to stay current with the various aspects of CV disease, diagnosis, and treatment. Therefore, other healthcare providers will always have gaps in their CV knowledge base; our course can be of value to close those gaps.

This year's event offers two options to participate. Attendees may join the meeting face-to-face at the Atrium Health Kenilworth Plaza, the flagship location of Sanger Heart & Vascular Institute; or, they may join virtually via livestreamed webinar. Seating for the face-to-face meeting is limited, so register early.

JOINTLY PROVIDED BY
