## Providers' Clinical Support System: Buprenorphine Office-Based Treatment for Opioid Use Disorders, The "Half and Half" Course

WEDNESDAY, SEPTEMBER 5, 2018

### Recovery Within Reach: Building Team Expertise in Office-Based Opioid Treatment (OBOT)

#### LOCATION

**North Carolina Medical Society**  
Foundation Auditorium  
222 N Person Street, Raleigh, NC 27601

#### DATE REGISTRATION PROGRAM

**Wednesday, September 5, 2018**  
8:00 am–8:30 am (*breakfast provided*)  
8:30 am–12:45 pm

#### FEE

**\$35.00**

[CLICK HERE TO REGISTER](#)

### DESCRIPTION

Opioid addiction is a chronic, relapsing brain disease that affects millions of Americans and produces a tremendous burden on the healthcare system. In 2002, U.S. physicians gained the opportunity to treat opioid-addicted patients with buprenorphine in primary care settings, commonly referred to as office-based opioid treatment (OBOT). OBOT has been shown to be effective in primary care settings and impacts public health through the reduction of opioid use, opioid overdose mortality, and transmission of infectious diseases. However, it remains underutilized.

One consistently cited barrier preventing OBOT expansion is lack of adequate clinical support given the additional needs for patient monitoring. Successful medication-assisted treatment (MAT) requires a team-based approach just like treatment for other chronic diseases. In addition, treatment is more effective when providers can use a trauma-informed and gender-responsive treatment plan.

The goal of this companion program to the AAP Clinical Support System: Buprenorphine Office-Based Treatment for Opioid Use Disorders (The "Half and Half" Course), is to increase the comfort level and expertise of the healthcare team by outlining a team approach, trauma-informed interventions, gender-responsive care, and making recommendations for the implementation of buprenorphine OBOT.

### AUDIENCE

Recommended for mental health professionals (including substance abuse counselors, social workers, psychologists, school counselors, and marriage and family therapists), practice managers, program administrators, nurses, medical assistants, care managers, care coordinators, and other professionals interested in this subject.

### OBJECTIVES

Upon completion of this activity, participants will be able to:

- Describe the presented framework of office-based opioid treatment (OBOT) including practice changes, medications used, psychosocial services, and integration/coordination components
- Utilize evidence-based interventions that are trauma-informed and gender-responsive to treat persons with substance use disorders
- Define the roles of an effective practice team, including primary care and behavioral health clinicians, working together with patients and families, and using a systematic and cost-effective approach to provide patient-centered care for opioid and other substance use disorders
- Increase medical and behavioral health professionals' receptivity and capability to work collaboratively as they evaluate and manage opioid and other substance use disorders using SBIRT (screening, brief intervention and referral to treatment)
- List key components of evidence-based and effective OBOT

### MEDICAL COURSE DIRECTOR

**Blake Fagan, MD, MAHEC, Asheville, NC**

### FACULTY

**Marie Gannon, LPC, LCAS, CSI**, is a licensed clinical addiction specialist, professional counselor, and clinical supervisor with over 15 years of experience working with patients with addiction disorders through the lifespan. She is the Behavioral Director of MAHEC OB's Perinatal Substance Use Clinic/Project CARA. As co-founder of the MAHEC substance use clinic, her passion is providing opportunities for education to healthcare providers with the goal of reducing the stigma against addiction. When she is not working, Marie loves snuggling her two kids and reading good books.

**Melinda Ramage, FNP, CDE**, is a family nurse practitioner with focused training in high-risk pregnancy. She is a certified diabetes educator specializing in women who have type one and type two diabetes during pregnancy. She is also a Certified Advanced Practice Addictions Nurse and the Clinical Director of MAHEC OB's Perinatal Substance Use Clinic/Project CARA. She is passionate about empowering patients in directing their own healthcare and is involved in local upstream movements to readdress healthcare delivery systems. She enjoys a good run in the woods and watching Netflix.

## CREDITS

**NAADAC:** This course has been approved by MAHEC, as a NAADAC Approved Education Provider, for educational credits. NAADAC Provider #96726. MAHEC is responsible for all aspects of their programming. Full attendance is required to receive credit from NAADAC. Approved for **4.0 hours**.

**NBCC:** MAHEC has been approved by NBCC as an Approved Continuing Education Provider, ACEP No. 5514. Programs that do not qualify for NBCC credit are clearly identified. MAHEC is solely responsible for all aspects of the programs. Full attendance is required to receive credit. Approved for **4.0 hours**.

### 4.0 CNE Contact Hours

Mountain Area Health Education Center (MAHEC) is an approved provider of continuing nursing education by the NC Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. Participants must attend 80% of the activity to receive credit. No partial credit is given for this activity.

**Psychologists:** MAHEC is recognized by the North Carolina Psychology Board as an approved Provider of Category A Continuing Education for North Carolina Licensed Psychologists. Approved for **4.0 hours Category A**. Full attendance is required to receive credit.

**CEUs:** MAHEC designates this continuing education activity as meeting the criteria for **0.4 CEUs** as established by the National Task Force on the Continuing Education Unit. You must attend the entire workshop to receive CEUs.

**Contact Hours:** MAHEC designates this continuing education activity as meeting the criteria for **4.0 Contact Hours**. Full attendance is required to receive credit.

## REGISTRATION

The registration fee for this program is \$35.00. This fee includes administrative costs, educational materials, and breakfast.

MAHEC has a pay-up-front policy for all CE programs. The only exceptions will be for pre-approved programs where an individual payment plan is appropriate. Registrations received without accompanying payment will not be processed and participants who have not paid the course fee will not be admitted into the program.

Cancellations received at least two weeks in advance of the program date will receive a full refund unless otherwise noted. Cancellations received between two weeks and up to 48 hours prior to the program date will receive a 70% refund unless otherwise noted. No refunds will be given for cancellations received less than 48 hours prior to the program date. All cancellations must be made in writing (fax, mail, or email). Substitutes can be accommodated in advance of the program.

## DESCRIPTION

Opioid dependence is epidemic in the United States. While progress has been made in training providers, the gap in providing effective treatment of opioid use disorders continues to widen—moving beyond heroin addicted individuals to a much larger and diverse segment of the population. This increase is predominantly due to an alarming increase in addiction to prescription opioid analgesic medications.

Buprenorphine, the most recent addition to the pharmacotherapies available to treat opioid dependence, is novel among the opioid pharmacotherapies because of its partial agonist properties. It has been placed on Schedule III and is available by prescription from a physician's office-based practice.

Recognizing the impact of this addiction, as well as learning how to treat opioid use disorders, are important steps in combating this ever growing medical problem. To obtain the waiver to prescribe, providers are required to take specialized training. PCSS-MAT uses the Half-and-Half format (first, 4.25 hours of face-to-face training with an instructor, followed by 3.75 hours of on-your-own-training that must be completed along with a post test). This meets the training requirements for physicians; however, additional training is required for advanced practice providers. The training focuses on the specifics of treating patients with opioid use disorders in office-based settings and clinical vignettes to help trainees think through "real life" experiences in opioid use disorders treatment. Once the waiver training is completed in full, participants will receive a CME certificate of attendance from AAAP.

## AUDIENCE

Recommended for prescribers in primary care, emergency medicine, pain management, psychiatric, HIV, and addiction medicine.

## OBJECTIVES

Upon completion of this activity, participants will be able to:

- Define the federal Drug Abuse Treatment Act (DATA) of 2000 and the subsequent revisions that list the criteria needed for Office-Based Opioid Treatment (OBOT)
- List the criteria for establishing a diagnosis of opioid dependence
- Distinguish between spontaneous withdrawal and precipitated withdrawal and the appropriate methods of buprenorphine induction
- Describe and contrast the functions of full mu agonists, partial agonists, and antagonists
- Explain the interplay between pain and addiction and how buprenorphine can be used to help stabilize these patients
- Describe the basic approach used in at least three different types of non-pharmacological treatments of opioid dependence
- Describe three symptoms of opioid withdrawal or intoxication that mimic symptoms of a psychiatric disorder
- Describe at least three factors to consider in determining if the patient is an appropriate candidate for office-based treatment with buprenorphine
- Describe at least three areas that should be covered in the rules and expectations communicated to patients during the patient assessment process
- List at least three situations in which patient information, with patient identity, can be shared under current laws protecting the patient's confidentiality 42 CFR and HIPAA
- Reduce and minimize buprenorphine misuse and diversion
- Describe the drug interactions of buprenorphine and pediatric exposures

## FACULTY

**Blake Fagan, MD**, completed his undergraduate education at the University of Missouri–Columbia, medical school at Vanderbilt University School of Medicine in 1998, and family medicine residency at the Mountain Area Health Education Center (MAHEC) in Asheville, NC in 2001. He has been a faculty member at MAHEC since 2001. During that time, he has been the co-clinical director, assistant residency director, and the residency director. Currently, he is the Chief Education Officer and Interim Medical Director of the Family Health Center at MAHEC, and a Professor with the Department of Family Medicine, UNC Health Sciences at MAHEC.

## CREDITS

**CME Accreditation:** This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American Academy of Addiction Psychiatry and MAHEC. AAAP is accredited by the ACCME to provide continuing medical education for physicians.

**Credit Designation:** American Academy of Addiction Psychiatry designates this Other activity ("Half and Half"—Half face-to-face live course and Half online course) for a maximum of **8 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Method of physician participation in the learning process:** Credit will only be awarded for completing both the "first" and "second" half of the training. To be awarded a maximum of **8 AMA PRA Category 1 Credits™** and a Buprenorphine Training Completion Certificate, you must complete 4.25 hours of the first live half and 3.75 hours of the second enduring half and receive a minimum cumulative score of 75% on the examination. No partial credit is awarded for this training.
